

Vermont Farriers Association  
 Presents  
**Dr. Tracy Turner, DVM,  
 MS, DACVS**  
**Lameness & Podiatry Issues  
 In the Performance Horse**

When: **Saturday, March 13<sup>th</sup>, 2010**      Time: **9:00 AM to 4:00 PM**  
 Where: **Bristol Rescue Squad Building, 45 Monkton Road, Bristol, VT**

Dr Turner apprenticed with a farrier in 1972 & used those skills to help finance his education through vet school at Colorado State University; he interned at University of Georgia, completing his surgical residency & MS at Purdue University. In 1986 he became a Diplomat, American College of Veterinary Surgeons. He was professor at several Universities & was Chief of Large Animal Surgery while at Minnesota. He is the world's leading author & researcher on the subject of navicular syndrome & heel pain in horses. Those papers have explained how it is different from or may be confused with more generalized pain & discomfort in the heel area, being instrumental in helping vets & farriers together around the world try new procedures for chronically lame horses, avoiding a lifetime sentence of unsoundness. He feels that lameness problems continue to be the most common causes of performance issues in our equine athletes. Dr Turner utilizes a number of different diagnostic techniques & treatments to determine the best treatment plan to return the individual equine back to its desired occupation. This includes involving the horse's vet, the farrier & perhaps referral vet care. Dr Turner is currently in private practice at Anoka Equine Veterinary Services, a leading equine referral center in the upper Midwest where his specialty is lameness, navicular disease orthopedics, podiatry & back issues.

Light lunch included in fee. Annual Meeting & election of officers will follow the clinic.

This clinic is open to everyone. For questions or further information, please contact Diane Saunders at 802-453-3750 or [disqtrhs@gmavt.net](mailto:disqtrhs@gmavt.net).
